Módulo Export / Import for osCommerce

Module for osCommerce community to Export and Import XLSX files. The module is structured to perform the import and export, but lack programming of the fields as the customer needs.

1) Where do we start?

Upload the folder files_excel a catalog/admin/ and change permissions 777

Upload the folder js a catalog/admin

Upload the next files to catalog/admin

- export.php
- exportador.php
- importador.php

Upload the file includes/boxes/excel.php to catalog/admin/includes/boxes

Upload the folder includes/phpclasses to catalog/admin/includes

The next files must be compare with the originals:

- includes/languages/español.php
- includes/column_left.php
- includes/configure.php
- includes/filenames.php

2) Firsts steps

From the administration will see a new entry in the left column where you can click and view the following screens:

Exportador | Importador

<input type="button" value="Export"/>	
<input type="button" value="Import"/>	Importador
	Fichero .xlsx <input type="text"/> <input type="button" value="Examinar..."/>
	<input type="button" value="Subir"/>

Export

Import
