Version osCommerce 2.2rc2a Sparx

osCommerce system for conducting virtual stores, containing catalog and part administrator. All credits are for **Harald Ponce de Leon** and the team **Mindsparx**, for performing this wonderful framework and this admin respectively. My mission has been to integrate the management system within Mindsparx version 2.2rc2a of Harald Ponce de Leon, to come and built by default. After the installation, we will have the following additions.

1) Added in the framework.

- New management system, created by the team Mindsparx Admin version 4.0. (<http://addons.oscommerce.com/info/6440>)

Part Login

The appearance of the authentication part is a touch much more attractive than available by default 2.2rc2a version. In the next image will show you the look of the homepage of the admin. Without doubt the best osCommerce contributions needed. Its share basic administration was not up to the currents softwares.

Part index administration

- Added CKEditor Wysiwyg editor, categories.php and mail.php (<http://addons.oscommerce.com/info/7112>)

Wysiwyg editor celebrity line with the new design of the administration, its mission is to enrich material for products, categories and items of mail. Its use is as easy as his brothers TinyMCE and FCKeditor.

Then I add changes of the basic osCommerce catalog, with the realization of some display changes to improve the aspect.

- Added new display basic osCommerce, part catalog.

The screenshot displays the osCommerce online merchant interface. The top navigation bar includes links for 'Inicio » Catálogo', 'Salir', 'Mi Cuenta', 'Ver Cesta', and 'Realizar'. The main content area is titled '¿Que hay de nuevo por aquí?' and welcomes a user named 'Pedro!'. It provides information about the default configuration and a disclaimer that products are for demonstration only. A sidebar on the left contains sections for 'Categorías' (Hardware, Software, Películas, DVD), 'Fabricantes' (a selection dropdown), 'Novedades' (featuring a Microsoft Internet Keyboard PS/2 for \$69.99), 'Búsqueda Rápida' (a search box with instructions), and 'Información'. The main product display area, titled 'Nuevos Productos En enero', shows three items: a Hewlett Packard LaserJet 1100Xi (\$499.99), a Microsoft IntelliMouse Explorer (\$64.95), and a Microsoft Internet Keyboard PS/2 (\$69.99). A right sidebar contains 'Compras' (showing a cart with 2 Microsoft Internet Keyboards and 1 Hewlett Packard LaserJet 1100Xi), 'Ofertas' (featuring Blade Runner Director's Cut for \$30.00), 'Comentarios' (no comments yet), 'Idiomas' (English and Spanish flags), and 'Monedas' (US Dollar).

- Added functions and classes for use Xajax. (<http://addons.oscommerce.com/info/7175>)

With the package installed xajax have the option to use ajax in our store easily.

2) Contributes to the Community

If this manual has been useful and believe that he deserves a reward, here attached his paypal account.
